Instructions:

1. Click on File -> Make a copy

Include your IPO Chart with your code in Eclipse IDE: We will discuss and demonstrate this in the computer lab.

IPO CHART

Program name:	**DigitExtrator**	
INPUT	**PROCESS**	**OUTPUT**
Hint: What will the user input?	Hint: What is the program going to do with the input information?	Hint: What will the screen display after user input?
The user will enter an integer + what place value they want extracted.	Depending on what letter the user chooses, the number will be divided differently, and the remainder will be different. Corresponding to ones, tens, hundreds, etc.	First, you will write whether you want the tens place, hundreds place, etc., and then the code will show what number that is.
