What error message did you encounter (if any)?

Exception in thread "main" java.lang.Error: Unresolved compilation problem:
Type mismatch: cannot convert from int to boolean
at mastery.MySavings.main(MySavings.java:47)

.

What unexpected behavior did your program exhibit?
It did not work. At all.

What caused the issue? (e.g., syntax error, logic error, incorrect function usage, etc.)
I only added 1 equal sign to choice.

Include a screenshot of specific lines of code.

```
// Depending on number inputed, the value is different
if (choice = 1) {
    System.out.printf("Total in bank: $%.2f\n", bank.getTotal());
} else if (choice == 2) {
    bank.addPenny();
} else if (choice == 3) {
    bank.addNickel();
} else if (choice == 4) {
    bank.addDime();
} else if (choice == 5) {
    bank.addQuarter();
} else if (choice == 6) {
    bank.takeMoneyOut();
}
```

How did you fix the issue?
You have to add two equal signs to choice == 1

Correct lines of code screenshot

```
if (choice == 1) {
    System.out.printf("Total in bank: $%.2f\n", bank.getTotal());
} else if (choice == 2) {
    bank.addPenny();
} else if (choice == 3) {
    bank.addNickel();
} else if (choice == 4) {
    bank.addDime();
} else if (choice == 5) {
    bank.addQuarter();
} else if (choice == 6) {
    bank.takeMoneyOut();
```
