Include your IPO Chart with your code in Eclipse IDE: We will discuss and demonstrate this in the computer lab.

IPO CHART

Program name:	CarPayments	
INPUT	PROCESS	OUTPUT
Hint: What will the user input?	Hint: What is the program going to do with the input information?	Hint: What will the screen display after user input?
The user will input the Principal, the interest rate, and the months of the contract	The program will take principal and multiply it by the interest rate which is divided by 12, that number will be the numerator which is then divided by 1 subtracted by that of the interest rate which is added by one and divided by 12 which is to the power of negative months of the contract.	It will output the monthly payment cost.
